

SUPER PAC[™]

DRILLING FLUID ENHANCER

DESCRIPTION

SUPER PAC is an easy mixing, liquid polymer that enhances the properties of a bentonite drilling fluid. When added to HYDRAUL-EZ[®] or SUPER GEL-X[®], SUPER PAC creates an ideal fluid for drilling in a variety of conditions.

RECOMMENDED USE

This multifunctional polymer is designed for use as a drilling fluid additive for inhibition of clay and shale, minimizing fluid loss to the formation and increasing viscosity for cuttings transport and suspension.

CHARACTERISTICS

- Increases viscosity of drilling fluid
- Inhibits the hydration of clays and shale
- Provides filtration control in both fresh and saltwater
- Reduces fluid loss in permeable formations

MIXING AND APPLICATIONS

Mix at low shear through a mud hopper. Add 0.5 to 1 quart per 100 gallons of existing bentonite drilling fluid for hole stabilization.

PACKAGING

6-8 lb jugs per case, 18 per pallet or 44 lb pail, 32 per pallet. All pallets are plastic-wrapped.
