

Versafoam®

Drilling Foam

Description: Versa Foam® is a biodegradable, liquid foaming agent for use in fresh and salt water air rotary drilling.

Recommended Use: Dry air rotary drilling or mixed with water for foam drilling.

- Characteristics:**
- Mixes easily in fresh or salt water
 - Reduces water consumption
 - Lubricates and cools bit, improving penetration rate
 - Reduces hydrostatic pressure
 - Suppresses dust

Mixing and Application:

Foam Drilling.....	7.5-12.5 litres per cubic metre or 6-10 pints per 100 gallons water
Mist Drilling.....	3.75-5 litres per cubic metre or 3-4 pints per 100 gallons water
Dust Suppressant.....	0.6-1.5 litres or 0.5-1 pint to air stream

Packaging: 25L plastic pails, 32 pails per pallet or 200L drums. All pallets are shrink-wrapped.
