

Bentonite Coarse

Approx 5mm Nominal Screened Bentonite

Description: Bentonite Coarse is granular bentonite composed of polymer-free, dried clay in various mesh sizes.

Recommended Use: May be used as casing seal, hole abandonment material, and for sealing earthen structures.

Characteristics:

- Provide a positive seal
- Will not shrink or crack
- Re-hydrates
- Less than 10% moisture

Mixing and Applications: Dry shallow abandonment.....Pour required amount directly down borehole; hydrate with fresh water

Earthen structure seal.....Normal treatment is 0.5-1 kilogram per ft² depending on soil type

Packaging: 25 kg plastic bags, 40 bags per pallet. All pallets are shrink-wrapped.
